

## **Noah - install Devices using .oxe files**

by HUROLURA » Fri May 12, 2006 10:29 pm

*"The official installation process is as followed (do not remember where I found this):*

### ***Oxe installation instruction,- example: EDS8i for Noah***

#### **PC:**

1. Download the #Noah#EDS8i\_NoKeys.oxe on your computer
2. Close all CreamWare-Applications (Noah, SFP, SCOPE 4.0 ...)
3. Doubleclick the oxe-File
4. The "CreamWare-PlugIn Installer" will open
5. Select only the Noah-Application
6. Klick on "Install"
7. Close the "CreamWare-PlugIn Installer"
8. Connect Noah via USB and start the Noah editor software
9. Follow the instructions of the installation prozess

10.

*At the end of installation the Synchronizer will open automatically  
The Synchronizer is needed to copy the Device files into your Noah.*

11. Select the grey folder Icon of the EDS8i on the right
12. The Icon becomes yellow and other folders will be shown
13. Make sure that there is enough "Available Memory" left

14.

*Now press the synchronize button and wait until all the files are written in your Noah-Synthesizer*

15. After synchronisation you have to reboot your Noah

16. Have fun with your new Plugin

#### **Mac:**

1. Download the #Noah#EDS8i\_NoKeys.oxe.bin on your computer
2. Copy this file into the "oxe" folder (//Noah//App//oxe).
3. Rename the file #Noah#EDS8i\_NoKeys.oxe.bin into #Noah#EDS8i\_NoKeys.oxe
8. Connect Noah via USB and start the Noah editor software
9. Follow the instructions of the installation prozess

10.

*At the end of installation the Synchronizer will open automatically  
The Synchronizer is needed to copy the Device files into your Noah.*

11. *Select the grey folder Icon of the EDS8i on the right*

12. *The Icon becomes yellow and other folders will be shown*

13. *Make sure that there is enough "Available Memory" left*

14.

*Now press the synchronize button and wait until all the files are written in your Noah-Synthesizer*

15. *After synchronisation you have to reboot your Noah*

16. *Have fun with your new Plugin*

### **Noah .exe files**

*by garyb » Fri Apr 04, 2014 11:33 pm*

*"noah\_ex\_nokeys.exe" is an installer for all the Noah EX devices. use this one.*

*"Noah\_nokeys.exe" is an installer with all of the Noah devices.*

*the individual oxes are for when a single instrument needs to be installed.*

*connect the Noah to the computer, put the exe file into the exe folder and then run the remote os. i don't remember the exact sequence of clicks to install the synths, it's been some 7 or 8 years since i last did it. the manual and/or readmes should give enough of a hint....*
